

Summer-Ready Skin

Our top 10 beauty buys will have you head-to-toe hot in no time.

Warmer weather means less clothing, which, in turn, means more skin. Time to lather, scrub, tweeze, and polish your way to a brighter, smoother, silkier you. Considering summer most likely means more “kid time” and less “me time,” every minute counts. There just aren’t enough hours in the day to hop off to the spa. (Come to think of it, there’s *no* time of year when that’s an easy option.) Here, the best time-saving and beautifying products to get your body summer-ready in no time flat.

◀ We know what you’re thinking: Who has time for a facial?!? Well, *you* do. **Clean & Clear Soft In-Shower Facial** does the job in one minute. For deep cleansing action that purifies, smoothes, and softens skin, we can all spare 60 seconds. (\$6.99; retail stores nationwide)
